

## About Us

## It All Started with One Cow

Driven by the vision to practice and promote sustainable cattle farming, we started our journey with just one A2 Gir cow – firstly delivering its pure and nutritious milk to family members and friends in Sanawad, a small town in MP.

Soon, due to the premium quality of milk, the word spread around and the demand started to increase.

In due time, we began to supply milk from Sanawad to Indore city, every morning and evening through our own bus.

Over the span of 12 years, we became a name synonymous to pure A2 milk in the region, enjoying the patronage of a large number of health-conscious customers. FROM A SINGLE COW, TODAY WE POSSESS 200 A2 GIR COWS.

We have a strong infrastructure which includes a huge cow-farm spread over 8 acres, consisting of an array of facilities for the cattle. we provide a hygienic and natural environment to cows. we feed them fully organic and nutritious fodder grown in our own farm. we give them regular medical attention and have trained personnel to take care of them. we have our own bulls for natural reproduction process – no artificial insemination is carried out. all our endeavors are in line with our belief that only a happy and healthy cow can give pure milk which nourishes the body, mind and soul. leveraging our experience in the dairy industry and building on our strong in-house infrastructure, we have now ventured into the manufacturing of ghee made from the milk of a2 gir cows, available by the brand name sukthakaram. like our milk, our a2 ghee too is of premium quality and contains innumerable health benefits.

## A young entrepreneur with a vision

Mr. Akhilesh Taparia is a Post Graduate in Management. A young and dynamic entrepreneur, his passion is to make pure, safe and nutritious food grown by sustainable methods a part of everyone's life. This has led him to create the Sukthakaram brand which has Ghee made from the milk of A2 Gir cows among other products. The brand benefits from his deep love for nature and his dedication towards the cause of cow welfare. The safe and happy place that he has so meticulously created for cows, where they are loved, cared for, nourished and nurtured, provides the base to create dairy products that are rich in purity and high in nutritional value.
